Portfolio I LinkedIn I Github

SUMMARY

Senior Frontend Engineer with 3+ years of experience building scalable, high-performance web applications using React, TypeScript, and modern SPA architectures. Proven track record of improving application performance, optimizing large-scale UI systems, and delivering production-ready features in fast-paced startup environments. Skilled in designing reusable component systems, managing complex state, and collaborating cross-functionally to translate business needs into robust technical solutions. Passionate about performance optimization, clean architecture, and mentoring teams to build high-quality products.

WORK EXPERIENCE

SENIOR FRONTEND DEVELOPER

Jeeva AI - Sep 2025 – Feb 2026

AI-powered CRM and lead generation platform enabling intelligent sales workflows through data provider integrations, AI Playbooks, and secure authentication systems.

- Led end-to-end development of critical frontend features, improving application performance by 35% through advanced optimization techniques (code splitting, lazy loading, memoization).
- Engineered scalable UI systems to efficiently handle large datasets, leveraging virtualization (react-window) to ensure smooth rendering.
- Integrated third-party data platforms via secure iframe communication, enabling seamless real-time data visualization.
- Collaborated with backend and DevOps teams to leverage AWS S3 and EC2 services for asset management, application deployments, and environment troubleshooting across development and production environments.
- Strengthened code reliability by implementing unit testing with Jest, reducing production bugs and regressions.

FRONTEND DEVELOPER

Trustt (formerly Novopay) - Jun 2022 – Jul 2025

Loan Management System for HDFC Bank's NBFC lending platform, supporting end-to-end loan servicing with foreclosure, part-payment, and repayment management capabilities.

- Built and scaled high-traffic fintech frontend applications using React, Redux, and TypeScript
- Designed reusable component architecture, improving development speed and consistency across teams
- Optimized frontend performance using browser-level techniques (caching, storage, rendering strategies), improving application load times
- Implemented robust state management using Redux Toolkit, ensuring predictable and scalable data flow
- Partnered with product and backend teams to deliver high-quality, customer-facing features at scale
- Actively participated in code reviews and Agile processes, maintaining high engineering standards
- Mentored junior developers and contributed to knowledge sharing within the team

SKILLS

Frontend Technologies - React.js, TypeScript, JavaScript (ES6+), Redux, HTML5, CSS3, Tailwind CSS, React Hooks, Responsive Design, Redux Toolkit, Browser APIs (Caching, Storage, Compatibility).

Architecture & Performance - SPA Architecture, Component Design, State Management, Code Splitting, Lazy Loading, Memoization, Virtualization (react-window), Debouncing, Browser Performance Optimization

Testing & Quality - Jest, Unit Testing, Debugging, Code Reviews

Tools & Platforms - Git, NPM, Webpack, ESLint, Chrome DevTools, Redux DevTools and CI/CD.

Backend & Cloud Infra - Node.js, Express.js, MongoDB, REST APIs, AWS (Basics – S3, EC2 exposure).

EDUCATION

Karpagam College of Engineering, Coimbatore

Electronics and Communication Engineering

- Final CGPA: 7.6

Aug 2016 - Sep 2020

CERTIFICATIONS

- Fellowship in Software Development – Full Stack (2025)
- Programming with JavaScript – Meta (2024)
- Web Development Bootcamp – Udemy (2023)
